## What are Prosecutors saying about OSCR360?

*"[OSCR360] was used during the testimony of a main witness in our case. We were able to have the witness walk through the crime scene with the use of the 360. The jury was able to see the witness' vantage point of the events that occurred. The witness was able to articulate where all of the parties involved in the crime were located [using OSCR360]. We were pleased with the results, it helped us explain the crime scene to the jury."*
